2 steps = 600 mm

3 steps = 900 mm

4 steps = 1200 mm

CUSTOM DEPTH

- 3 STEP DESIGN - BOARDING LADDER

WEIGHT	6 kg
UNDER DECK REACH	0,9m
FOLDED DIMENSIONS	1.04x0.49x0.07 m
MAXIMUM STEPS	4

Our boarding ladder is characterized by its lightweight and easy storage capabilities. You can choose between a 2,3 or 4 step set-up depending on the height that needs to be covered.

The main part is made out of one piece of carbon fiber. This optimizes the strength and stability of the product which adds to the feeling of safety while using it.

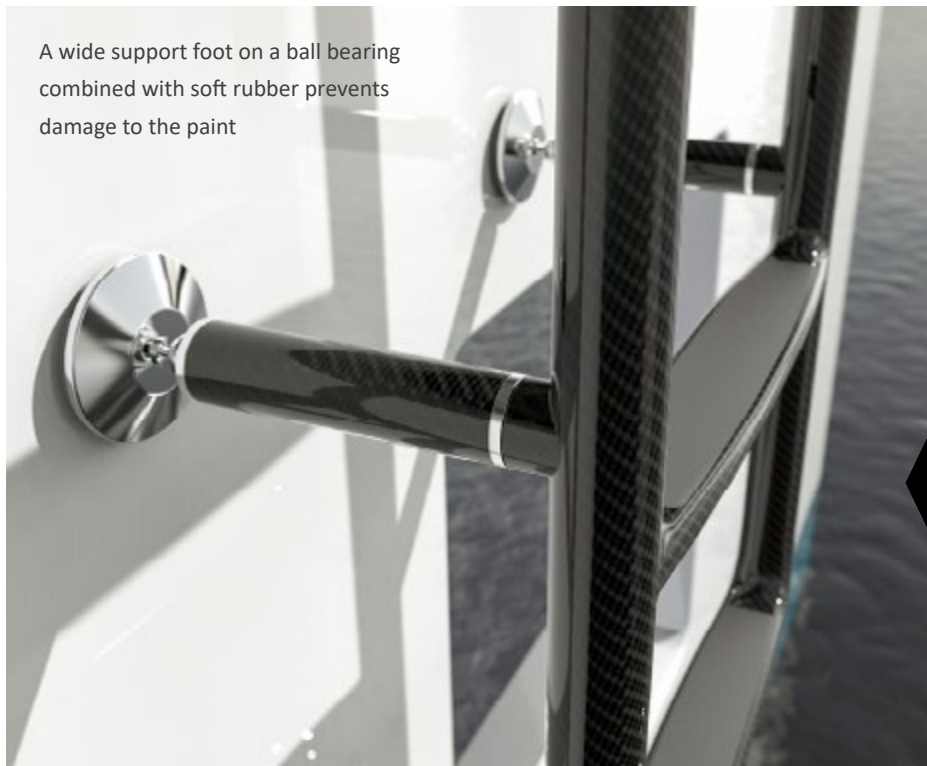

The ladder is attached on the edge of the deck while additional support legs rest on the side of the yacht.

EASY STORAGE

Storage is easy as the top legs are turned inwards while the support legs remain unscrewed.

A wide support foot on a ball bearing combined with soft rubber prevents damage to the paint

We offer different step surfaces like natural, non-skid or teak
